

Metal Bellows Couplings I Further Series

Based on series KE with flange hubs

- ✓ screw connection - external or internal
- ✓ customized version on request
- ✓ variable dimension / all metal bellow versions possible

Combination KM/KSD

- ✓ for connection of drive shafts with different shaft diameters - lateral clamping hub for big diameters,
- ✓ conical clamping hub for small diameters

Form-fitted hub version

- ✓ clamping hub additional with keyway
- ✓ special hubs with internal toothing such as DIN 5480
- ✓ low-backlash pluggable or slide mounting for profile shafts
- ✓ as forced rotation due to overload (observe Tmax of metal bellow)
- ✓ optional for all series on request

Forced rotation for bellow breaking protection

- ✓ bellow breaking protection by intern forced rotation (claw stop) for increased system stability in case of malfunction of the metal bellow due to overload or incorrect high shaft misalignment, Generally possible as special solution for all series
